

WHITE SANDS SPACE HARBOR AREA 1,  
HELICOPTER STAGING AREA

HAER No. NM-28-L

(Space Shuttle Landing Facility Area 1, Helicopter Landing Pad)

White Sands Missile Range

Approximately 4,900 feet northwest of intersection of Runways 17/35  
and 23/05

White Sands vicinity

Doña Ana County

New Mexico

HISTORIC AMERICAN ENGINEERING RECORD

WHITE SANDS SPACE HARBOR AREA 1, HELICOPTER STAGING AREA  
(Space Shuttle Landing Facility Area 1, Helicopter Landing Pad)

HAER No. NM-28-L

Location: White Sands Missile Range  
Approximately 4,900' northwest of intersection of  
Runway 17/35 and Runway 23/05  
White Sands vicinity  
Doña Ana County  
New Mexico

U.S.G.S. 7.5 Minute Las Cruces, New Mexico,  
Quadrangle, Universal Transverse Mercator Coordinates  
(center of runways): E 32.944408 N 106.41993 Zone 13S,  
NAD 1983

Construction: 1988

Architect: Not known

Builder: Not known

Present Owner: Commander, U.S. Army White Sands Missile Range,  
New Mexico 88002-5018

Present Use: Vacant

Significance: The Helicopter Staging Area was an essential component  
of the White Sands Space Harbor (WSSH) from 1984-2011.  
It is considered to have national significance and is  
eligible for listing in the National Register of  
Historic Places (NRHP) under Criterion A for its  
association with the NASA Space Shuttle Program (SSP)  
with a period of significance of 1976-2011. Because  
it achieved significance within the past fifty years,  
Criterion Consideration G also applies.

Report

Prepared by: Robbie D. Jones, Senior Historian

WSSH	White Sands Space Harbor
WSTF	White Sands Test Facility

PART I. HISTORICAL INFORMATION

A. PHYSICAL HISTORY

1. Date of Construction

The Helicopter Staging Area was constructed in 1988.

2. ENGINEER

Not known.

3. BUILDER/CONTRACTOR/SUPPLIER

Not known.

4. ORIGINAL PLANS

Not available.

5. ALTERATIONS AND ADDITIONS

The U.S. Army initiated occupation and reuse of the facility in the summer of 2012.

PART II. STRUCTURAL/DESIGN INFORMATION

A. GENERAL DESCRIPTION

1. CHARACTER

The Helicopter Staging Area is a natural surface, gypsum landing pad and staging area for eight helicopters. A natural surface access road connects the single row of landing pads to the adjacent runways. Each landing pad is identified by a black, letter H navigational marker made of asphalt on the gypsum pad.

2. CONDITION OF FABRIC

When documented in March 2012, the Helicopter Staging Area had been abandoned for over six months, but was in fair condition. The staging area was showing signs of neglect due to the harsh desert environment, which requires that facilities are constantly maintained and repaired due to shifting sands, flash floods, and extreme temperature variations..

B. CONSTRUCTION

The Helicopter Staging Area is constructed of natural surface gypsum with landing aid markings made of asphalt.

C. MECHANICAL/OPERATION

The Helicopter Staging Area does not feature any mechanical equipment.

PART III. SOURCES OF INFORMATION

A. ENGINEERING PLANS AND DRAWINGS

There are no known engineering plans or drawings of the Helicopter Staging Area, however, plans were created around 1988 for construction of the asphalt navigational markings.

B. EARLY VIEWS AND HISTORICAL DATA

Historic photographs and maps of the WSSH are very limited. Historical views of the Helicopter Staging Area can be found on pages 16 and 17 of this document. Views are captioned and dated as available. The other historical data comes from a variety of sources cited in the Bibliography below.

The historic photographs and most of the historical data used in this documentation came from sources within WSTF and WSSH. Other more current imagery was obtained from the online WSTF Media Archive. Many of the original photographs have been donated to the WSMR Museum for digitization and curation. A body of recent aerial photographs were located and photocopied for inclusion in the HAER document to supplement the current ground photography.

C. INTERVIEWS

The following NASA and WSMR employees were interviewed for this documentation.

Robert E. Mitchell, WSTF Manager, September 2011.

Frank Offutt, WSSH Manager, September 2011.

Timothy Davis, WSTF Historic Preservation Officer, September 2011 and March 2012.

Bill Godby, WSMR Historic Preservation Officer, September 2011.

Doyle Piland, WSMR Museum Archivist, September 2011.

Dennis G. Perrin, NASA Johnson Space Center, Houston, Texas, and  
WSTF Facility Manager (1975-1989), June 2013.

E. LIKELY SOURCES NOT YET INVESTIGATED

Research was conducted at WSSH and WSTF using primary and  
secondary sources. Sources that were not investigated that may  
contain secondary information are archived at NASA's Lyndon B.  
Johnson Space Center in Houston, Texas.

Additional oral history interviews with other engineers and  
technicians could also prove useful.

PART IV. PROJECT INFORMATION

In 2011-2012, New South Associates (NSA), under contract with InoMedic Health Applications, LLC (IHA) of Kennedy Space Center, Florida, and in coordination with NASA and the U.S. Army, conducted background research and a historic architecture survey of resources at the NASA WSSH. The survey included the documentation and evaluation for NRHP eligibility for seventy-two resources located in four distinct areas. Based on this research, NSA determined that no properties remain at WSSH from the period prior to NASA acquisition in 1963 except for the footprint of the packed gypsum Runway 17/35.<sup>1</sup>

NSA recommended that the three NASA WSSH Runways and the Control Tower in Area 1 were individually eligible for listing in the NRHP and eligible as contributing resources to the "WSSH Shuttle Landing Facility District" under Criterion A and Criterion Consideration G for their association with the NASA SSP. None of the other sixty-eight inventoried properties were recommended individually eligible for listing in the NRHP due to lack of historical association with the NASA SSP or other historic contexts, lack of unique design or construction features, or insufficient integrity; however, nineteen of these properties, all of which lie within Area 1, were recommended as contributing resources to "WSSH Shuttle Landing Facility District," even though they were not recommended individually eligible for the NRHP. The historic district contains a total of twenty-eight resources: twenty-three are contributing and five are non-contributing.

After formally ending the SSP on August 31, 2011, NASA disposed of the WSSH and released use of the property to the U.S. Army WSMR. The property transfer was a federal undertaking on federally-owned property and subject to compliance with Section 106 of the NRHP Act of 1966, as amended. The undertaking resulted in an Adverse Effect to the NRHP-eligible WSSH Shuttle

Landing Facility District. To mitigate the adverse effects, NASA completed HAER Level II documentation of the historic district and relocated the Control Tower to the WSMR Museum for conservation, exhibition, and public interpretation.

The mitigation plan was defined in a Memorandum of Agreement (MOA), executed between NASA, the U.S. Army, and the NM-SHPO in August 2012. The properties within the historic district were documented with large format photography in March 2012.
